

Bibliography for the World Atlas of Seagrasses

This bibliography lists almost 500 sources which were used in developing seagrass distribution data and in producing the maps in the World Atlas of Seagrasses . They provide information on seagrasses in more than 120 countries and territories worldwide, and the majority include information on specific species. All data sources and can also be queried online through the GIS (go to <http://stort.unep-wcmc.org/imaps/marine/seagrass>). These references are in addition to the references cited in the text of the Atlas appear at the end of each chapter.
